MILITARY GRADE WATERPROOF SHOCKPROOF 7800 mAH OUTDOOR POWER BANK

jarvmobile.com

Thank you for your purchase of the Jarv TANK Military Grade Waterproof Shockproof 7800 mAh Outdoor Power Bank.

Features

The Jarv Tank 7800 mAh Power bank can charge your device at super-fast speeds. It is waterproof, shockproof, dustproof and scratch resistant thanks to its IP67 military grade certification - it is built to last.

Features that make the Jarv TANK power bank remarkable!

- High Capacity 7800 mAH rechargeable High Quality Grade A lithium battery - Recharges Faster, Last Longer
- High Output portable power bank with 2.1 Amp output to quickly charge all of your USB powered devices. That's 4 times faster than traditional USB batteries
- Waterproof – IP67 Certified Waterproof when cap is closed, IP65 water resistant when cap is opened
- Capable of charging smartphones, tablets and other large USB powered devices

• Check the fuel tank with the 4 LED charge status indicator- always know before you go

• Multi Circuit protection– Built-in short circuit , over charge and temperature protection to safeguard your devices

• Rugged scratch-resistant silicone exterior, shock-resistant and waterproof casing

• Portable and lightweight at only 9.5 ounces

• Uses Eco Friendly material- strong on the inside but friendly to the environment

• Great for outdoor sports and activities such as camping, hiking, backpacking, sports, and heavy duty work environments.

Compatibility

The Jarv Tank 7800 mAh Power bank has been designed to charge a variety of USB devices – specifically smartphones and tablets. It can also charge MP3 players, Gaming devices, Bluetooth headsets as well as any other USB powered device.

Charging your Jarv TANK power bank

Connect your power bank using the included micro USB cable by plugging in into the “IN” port on the battery. You can charge your power pack using your computer or using a third party USB wall adaptor. (The LED power indicator will flash when charging, as the power pack becomes more charged the LEDs will indicate how full it is until all 4 LEDs are green).

When using the power bank for the first time, please make sure that your power bank is fully charged.

For extended storage, or if the product will not be in use for a long time, please charge the power bank once every three months.

Charging your device using the Jarv TANK power bank

In order to charge your device, you will need to have a USB cable compatible with your device. These come standard with all Apple products as well as most other smartphones, tablets and MP3 players.

Simply plug the Standard USB end into the “OUT” port of the battery. This is important, DO NOT try and force it in if it’s not working. You’re probably trying the wrong port. Now, use the other end of the cable and plug it into the device you wish to charge. Next, press the Power button once to start charging your device. Once 100% charged, simply unplug your device and store your Jarv TANK power bank until you’re ready to charge again.

Checking the status of the Jarv TANK Power Pack

You can check the amount of juice your power bank has by pressing the Power button. There are 4 total LEDs. When the button is pressed the LEDs will illuminate for several seconds. Four LEDs means that the power pack is fully charged and one LED means that it’s almost empty.

To keep your power pack operating to its fullest potential, make sure to do the following:

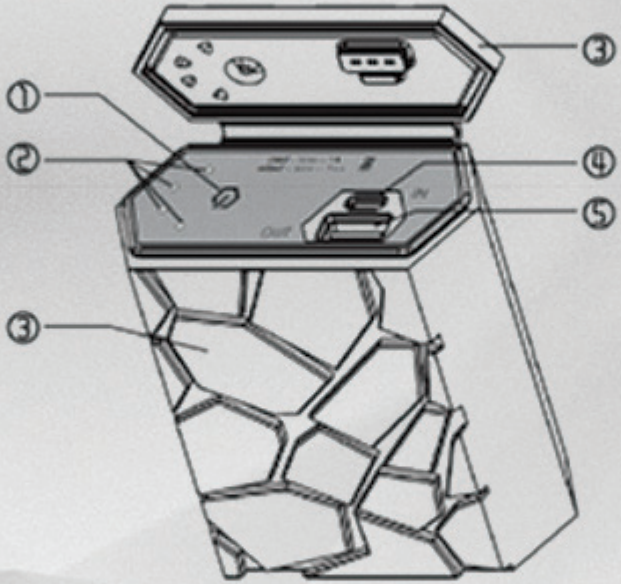
1. Do not wash the juice pack with harsh chemicals, soaps or detergents. Just wipe the case with a soft, water-dampened cloth. Wipe the pins gently with a soft, dry cloth.

2. Re-charge your juice pack once every three months when not in use, and remember to charge it for one hour before putting it away the first time

3. Try to keep your power bank dry, away from humid environment and corrosive materials

3. When not in use, please make sure the lid is tightly closed or keep it away from any heat sources

Jarv TANK 7800 Power Bank



1- Power button
2- LED Status indicator
3- Shock absorbent soft rubber finish
4- Micro USB “IN” charging port
5- Standard USB “OUT” port

Battery Specifications

- Input: 5V@1A
- Outputs: 5V@2.1A
- Dimensions: 4 x 3 x 1.2 inches
- Operating temperature: -10C-60C (14F-140F)
- Capacity: 7800 mAh
- Transfer Efficiency: 80%

LED Power Status Indicator:

Press down the power button indicator, LED indicator will stay on for 8 seconds

- 4 LED lights - 75%-100%

Warning:

- Improper use of this product may result in product damage, excess heat, toxic fumes, fire or explosion, for which damages you (“Purchaser”), and not Jarv (collectively “Manufacturer”) is responsible.

- Do not access the input/output simultaneously; this may affect the product performance or cause charging failure

- Do not store battery in high temperature environment (over 45C/113F), including intense sunlight heat.

- Do not place battery in fire or other excessively hot environments.

- Be cautious of excessive drops, bumps, abrasions or other impacts to this battery.

- If there is any damage to the battery such as dents, punctures, tears, deformities or corrosion, due to any cause, discontinue use and contact manufacturer or dispose of it in an appropriate manner at your local battery recycling center.

- Do not disassemble this battery or attempt to repair or modify it in any manner.

• Do not attempt to charge battery using any method, apparatus or connection other than the device's USB connector.

• For questions or instructions for the various ways to charge the power pack refer to this manual's "Charging your power pack" section.

• Do not attempt to replace any part of this battery.

• If this battery is intended by Purchaser to be used by a minor, purchasing adult agrees to provide detailed instructions and warnings to any minor prior to use. Failure to do so is sole responsibility of purchaser, who agrees to indemnify Manufacturer for any unintended use/misuse by a minor.

• All batteries have gone through a thorough quality assurance inspection. If you find that your battery is excessively hot, is emitting odor, is deformed, abrased, cut or is experiencing or demonstrating an abnormal phenomenon, immediately stop all battery use and contact Manufacturer.

• For extended storage, first charge your battery for one hour.

• Never dispose of batteries in the garbage .Disposal of batteries in the garbage is unlawful under state and federal environmental laws and regulations. Always take used batteries to your local battery-recycling center.

Legal

This Battery is meant for use only in conjunction with the appropriate mobile entertainment device. Please consult your device packaging to determine whether this Battery is compatible with your particular mobile entertainment device. Manufacturer is not responsible for any damages to any mobile entertainment device incurred through the use of this product. Manufacturer shall not in any way be liable to you or to any third party for any damages you or any third party may suffer as a result of use, intended or unintended, or misuse of this Battery in conjunction with any device or accessory other than the appropriate mobile entertainment device for which this battery is designed. Manufacturer will not be responsible for any damages you or any third party may suffer as a result of misuse of this Battery as outlined above.

If you are responsible for battery use with an unintended mobile entertainment device and damages result from such use, you agree to indemnify Manufacturer for any resulting injuries to any third parties). This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions :(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which
the receiver is connected.
- Consult the dealer or an experienced technician for help.

CAUTION:

To comply with the limits of the Class B digital device, pursuant to Part 15 of the FCC Rules, this device is comply with Class B limits. All peripherals must be shielded and grounded. Operation with non-certified peripherals or non-shielded cables may results in interference to radio or reception.
